**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest an apparatus for shorting a spark plug within an internal combustion engine having a second transforming means attached to the high voltage electrical circuit and a second low voltage electrical circuit; short circuit means attached to said second low voltage electrical circuit, as recited in the independent claim 1; an apparatus for monitoring the performance of an internal combustion engine having second transforming means attached to the high voltage electrical circuit consisting of a primary winding and a secondary winding; observation means for observing the high voltage electrical signal connected to said primary winding of said second transforming means, as recited in the independent claim 7; a method for shorting a single spark plug within an internal combustion having the steps allowing the high voltage electrical impulse to pass to ground and prohibiting the spark plug from attaining a threshold firing voltage, as recited in the independent claim 14; a method for observing the performance of a spark plug having the step of electrically connecting the high voltage current to a second transformer; creating a low voltage replica of the high voltage electrical signal without effectively lowering the voltage of the high voltage; firing the spark plug; displaying the characteristics of the low voltage replica, as recited in the independent claim 15, and in combination of the claims.

Art Unit: 2858

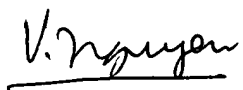

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
